

Flu Shots

There are few of us that do not have contact with the public and possible exposure to the Flu. In an attempt to eliminate sickness and generate healthier employees, Williamson County will be offering all full-time and part-time employees Flu shots at no cost. It is our hope that by providing all employees Flu shots that it will cut down on absenteeism and possible sickness in your own house hold.

- All full-time and part-time employees can receive a Flu shot at any of the clinic sites at no charge.
- Spouses enrolled in the medical plan can receive a Flu shot at any clinic location at no charge, or they can get a shot at their physicians office as allowed under the medical plan.
- Dependent Children 19 years or younger cannot be given a shot at any of the clinic sites, but can go to their physicians office and receive a shot as allowed under the medical plan.
- Retirees enrolled in the medical plan can receive a Flu shot at any clinic site at no charge or at their physician's office as allowed under the plan.

Find the location most convenient to you and put the date on your calendar. No excuses this year not to get a shot....
